## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3, 5-7, and 13 rejected under 35 U.S.C. 102(b) as being anticipated by Howie, Jr., US Patent 5,688,461. See figure 3. An electronic equipment comprising an operation tool 11 to be mounted on a support member; wherein said operation tool includes an operation portion to be operated by an operator; a mounting portion 45 formed spaced apart from the operation portion in a direction where an impact is applied to the operation tool, the mounting portion being arranged to be mounted on the support member; and a crushable connecting portion (39, 35) for connecting together the operation portion and the mounting portion (the crushable portion (39, 35) is capable of being crushed in the claim manner because it is thinner than both the knob portion of at 15 and the mounting portion at 43); the crushable connecting portion being adapted to be crashed upon an impact force exerted on the operation portion such that when the crushable

connecting portion is crashed, the operation portion will move with respect to the mounting portion. The crashable connecting portion radially extends from the mounting portion to the operation portion. The crashable connecting portion includes plural bridge portions 35 (by virtue of the openings at 37) radially extending between the mounting portion and the operation portion so as to connect together said mounting portion and said operation portion. A portion of the crashable connecting portion is bent along a length of the crashable connecting portion (see figure 3). The mounting portion will not move upon impact, as claimed. Cut away portions are shown at 37. The structure of claim 7 is clearly shown in figure 3, with outside piece 15 and inside piece at 43.

***Allowable Subject Matter***

2. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

3. Applicant's arguments with respect to the claims of record have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

This action is non-final.
